Funding Sources Trends

- Startup funding typically progresses through stages like Seed Funding, Series A, Series B, Series C, and potentially Series D and E.
- Each stage represents a different level of investment, valuation, and growth objectives, allowing startups to secure capital at various points in their development journey.
- Venture Funding, Equity Financed and Debt Financed are the top sources of fundings a start ups can look to target.

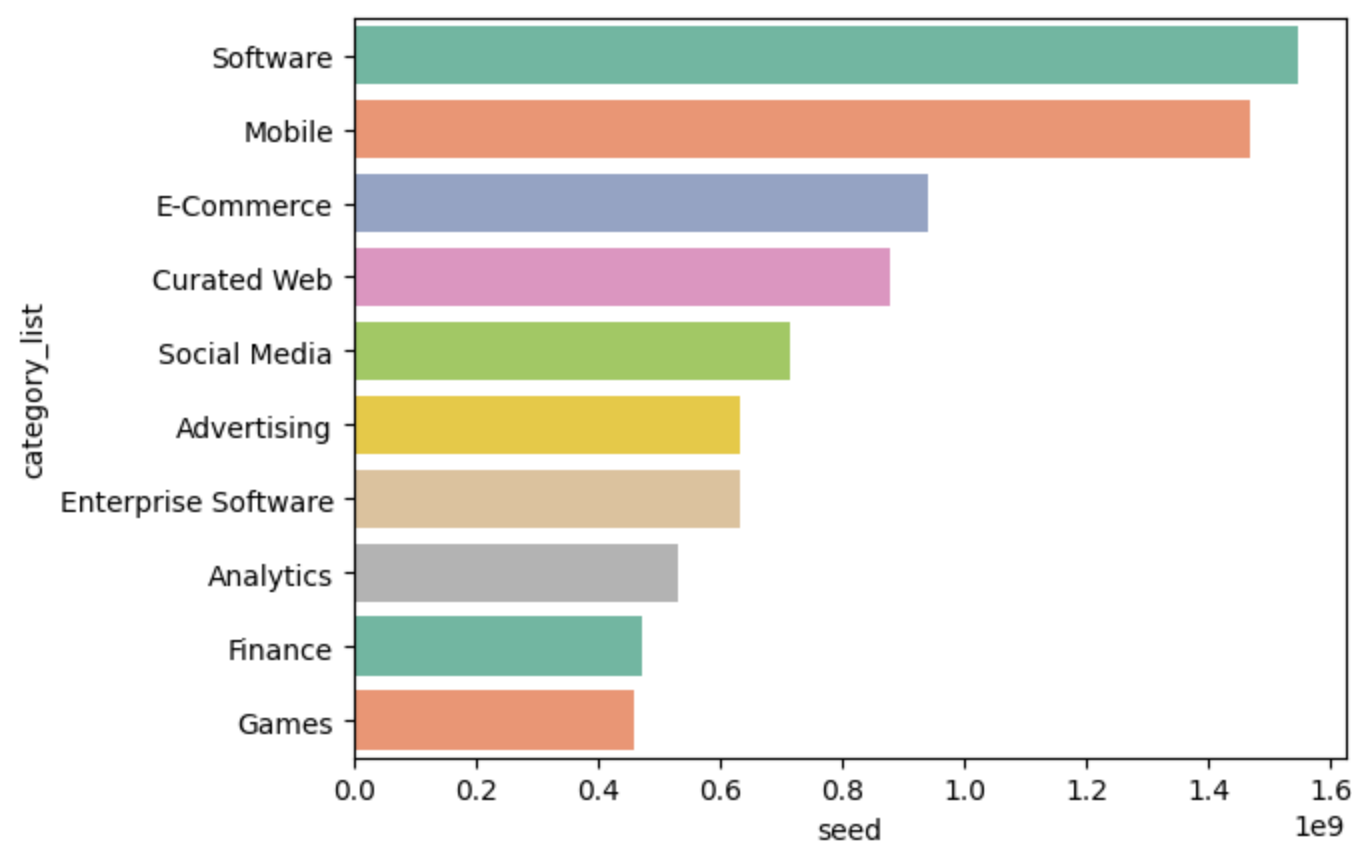

Funding Round Trends

- A funding round is anytime money is raised from one or more investors for a business.
- They're given a letter, such as A Round, B Round, C Round, etc. because each round follows another.
- The letter identifies which number of rounds they're on.
- Historically Round B is the round where most of the money is raised by startups.

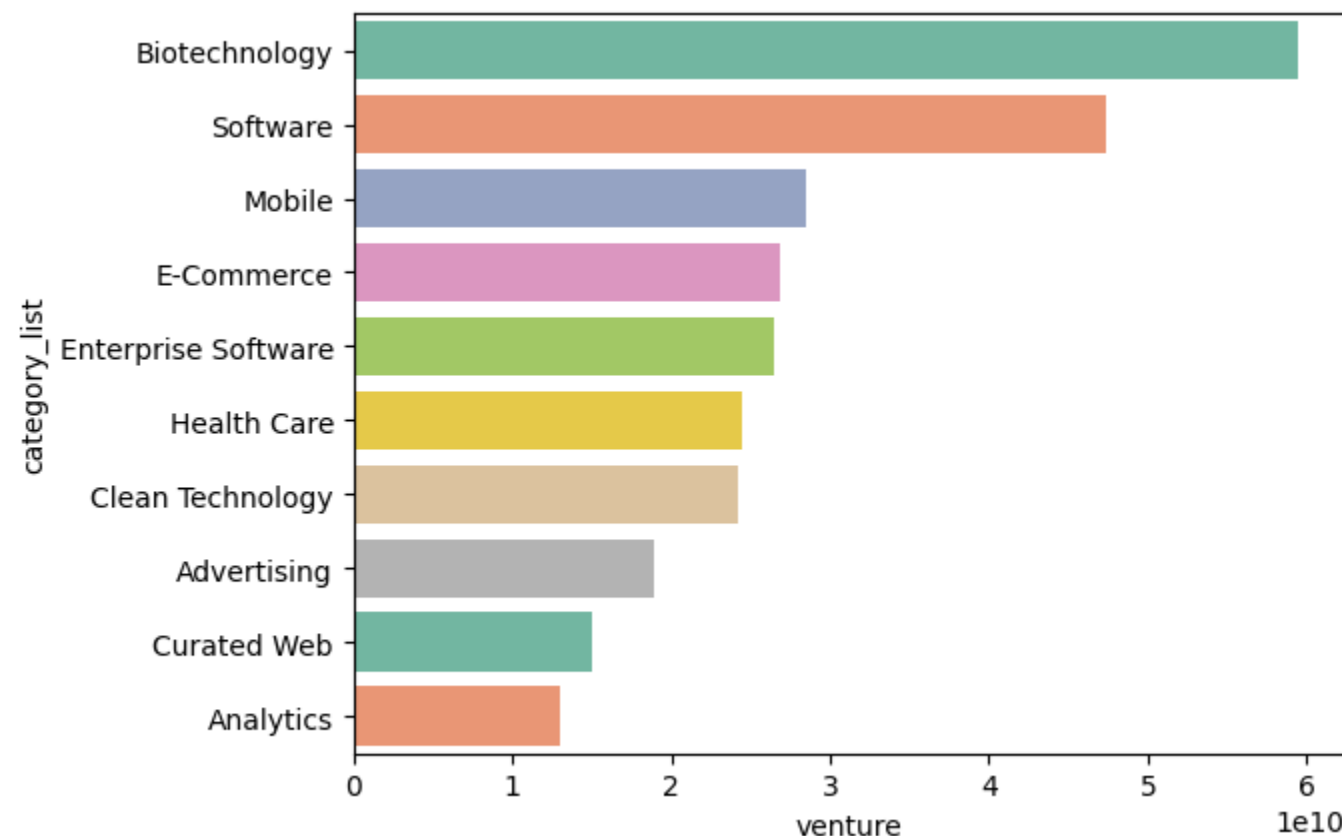

Seed Funding Distribution Across Categories

- Seed funding is a way for startups to raise early capital to support their development.
- It's usually the first round of institutional funding a startup receives, after getting funding from friends, family, angel investors, or an incubator.
- Software category being the top category to attract large seed fundings.

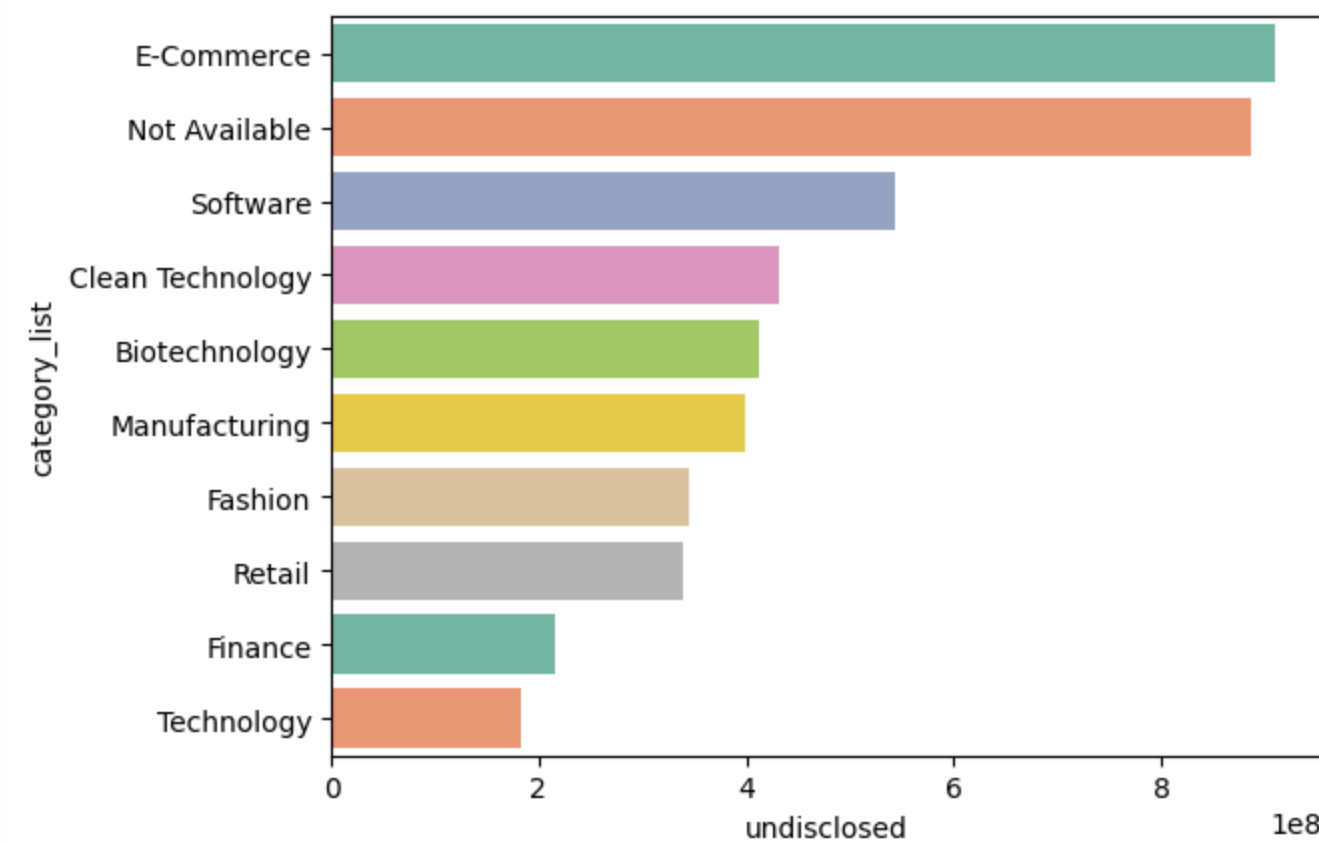

Venture Funding Distribution Across Categories

- Venture funding, also known as venture capital (VC), is a type of investment that provides capital to startups and small- to medium-sized businesses in exchange for an ownership stake in the company.
- Biotechnology category being the top category to attract large venture fundings.

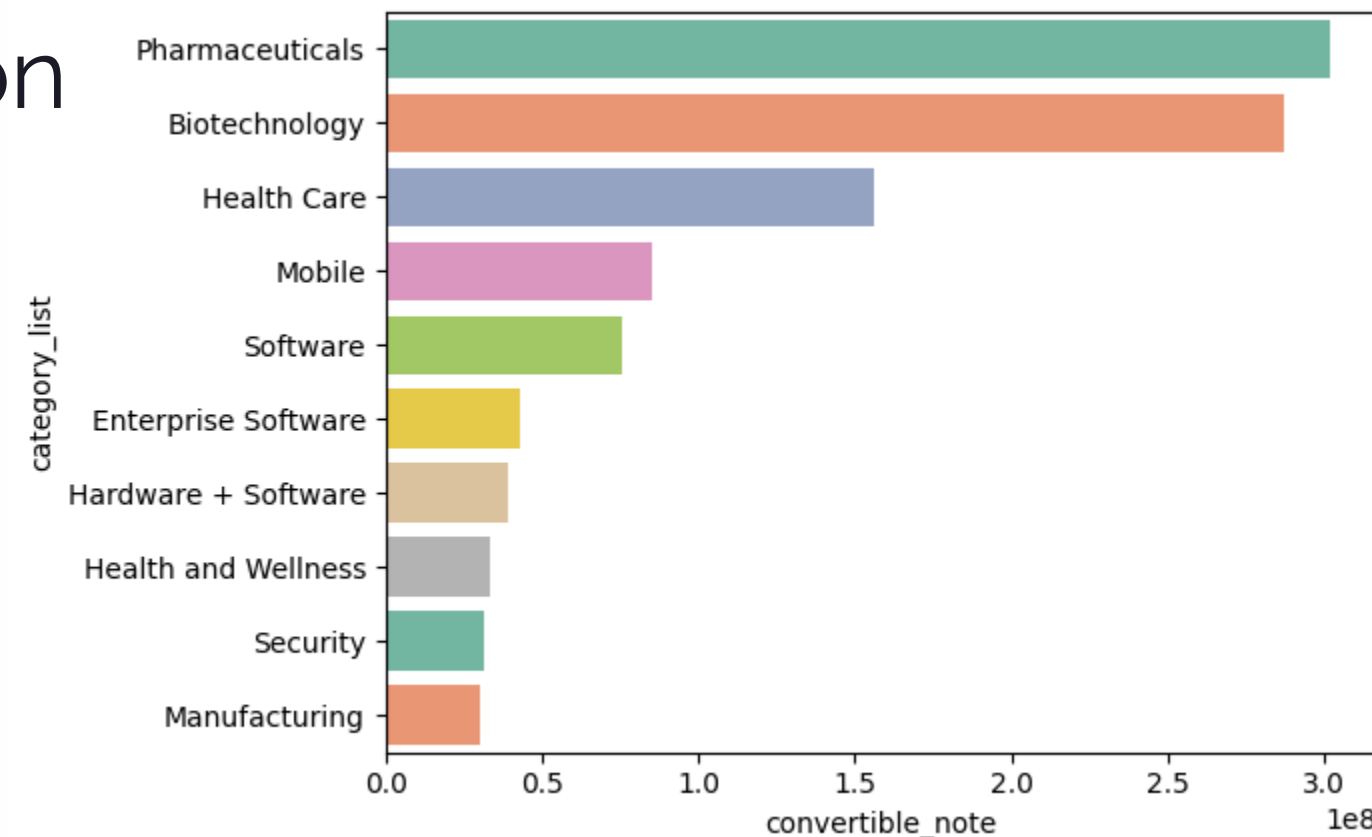

Undisclosed Funding Distribution Across Categories

- These are reserves that a company keeps but doesn't report on its balance sheet.
- They can include money set aside for future investments or to cover liabilities
- E-Commerce category being the top category to attract large undisclosed fundings.

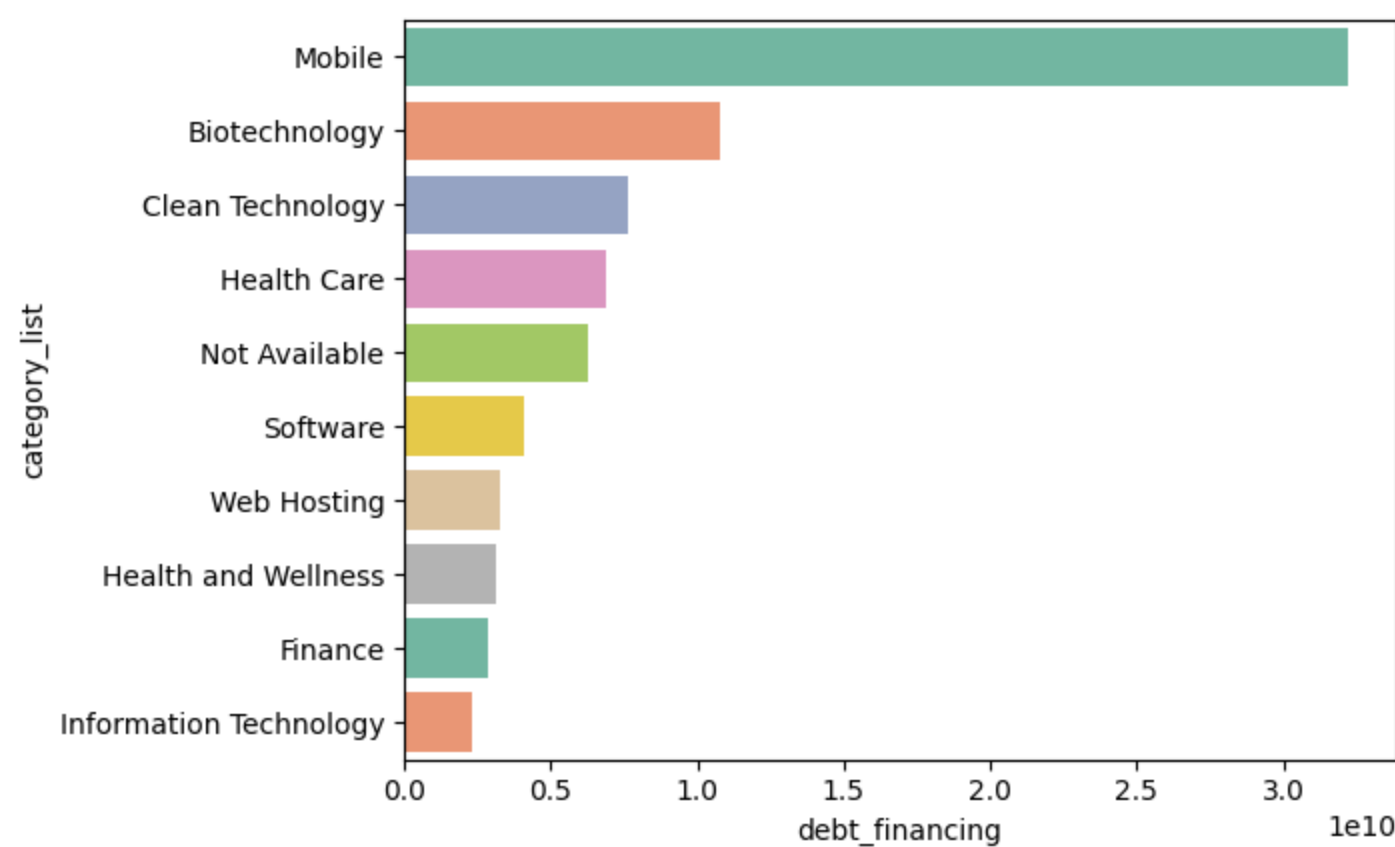

Convertible Note Funding Distribution Across Categories

- A convertible note refers to a short-term debt instrument (security) that can be converted into equity (ownership portion in a company).
- Convertible notes are often used by seed investors who invest in startups.
- Pharmaceuticals category being the top category to attract large convertible note fundings.

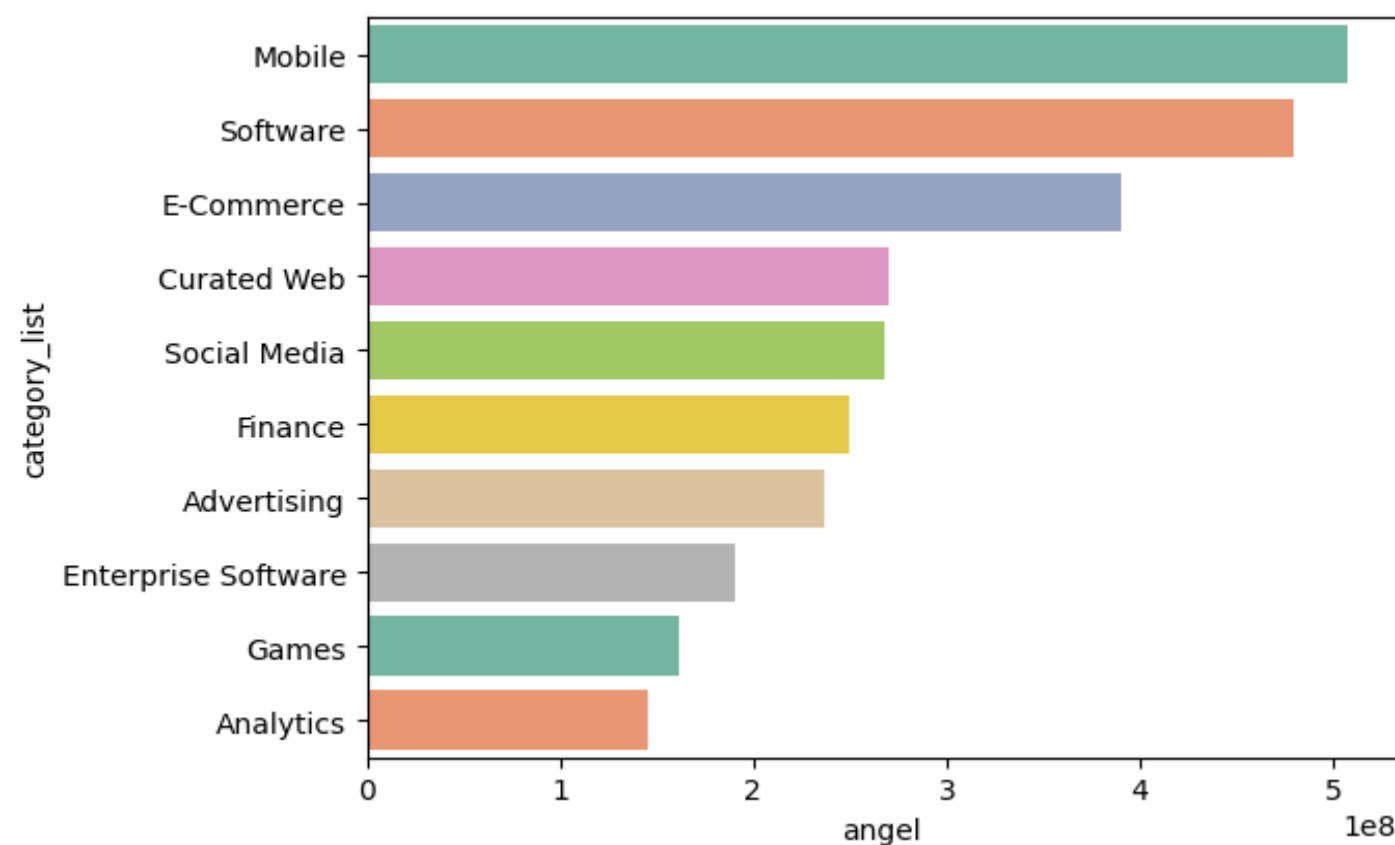

Debt Financed Funding Distribution Across Categories

- Debt funding is a way to raise money by taking on debt, or borrowing money, from an external source.
- The borrower is obligated to repay the principal amount plus interest over a set period of time.
- Mobiles category being the top category to attract large debt financed fundings.

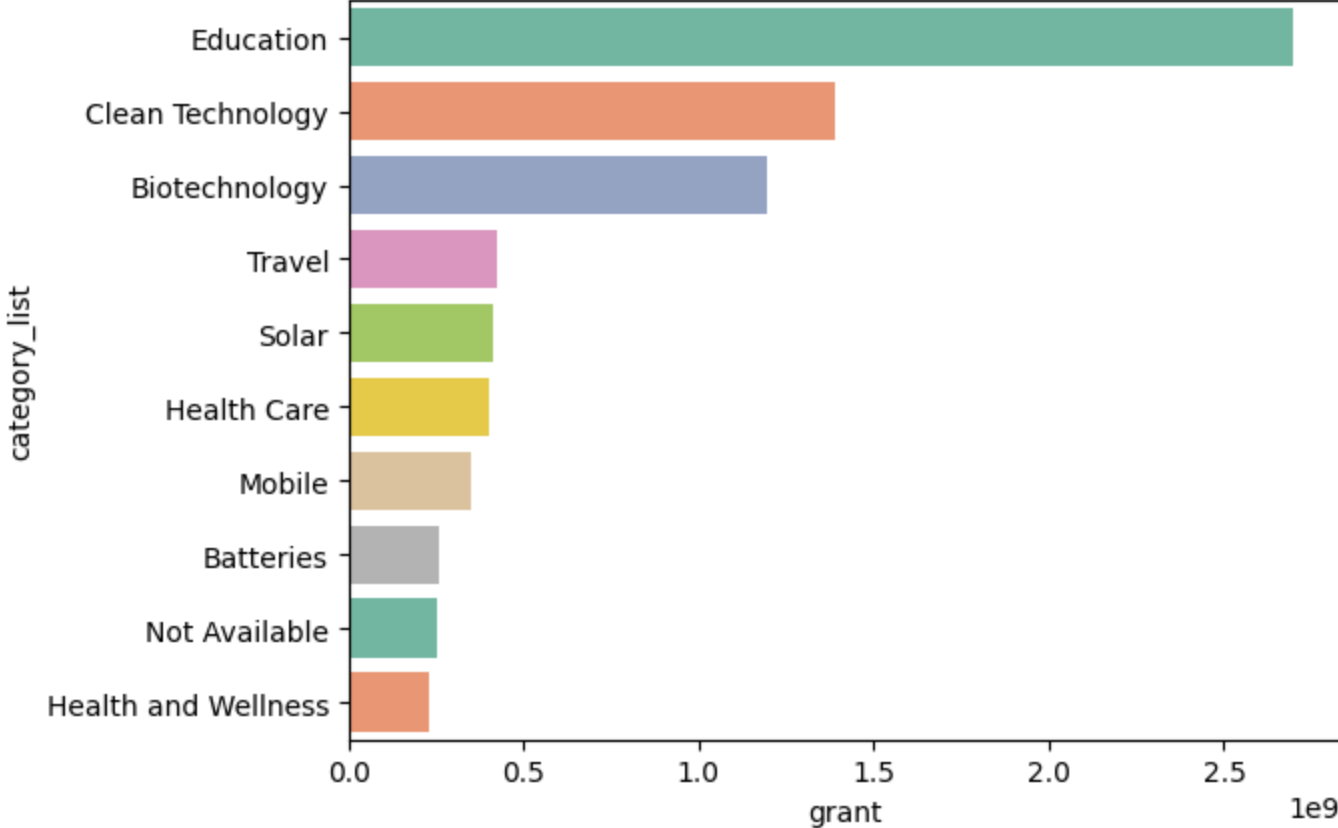

Angel Funding Distribution Across Categories

- Angel financing refers to an investment model wherein "business angels" – essentially, high net worth individuals – provide financial backing for small businesses in exchange for equity in the company.
- Angel financing can be a one-time investment, or it can refer to ongoing support.
- Mobiles category being the top category to attract large angel fundings.

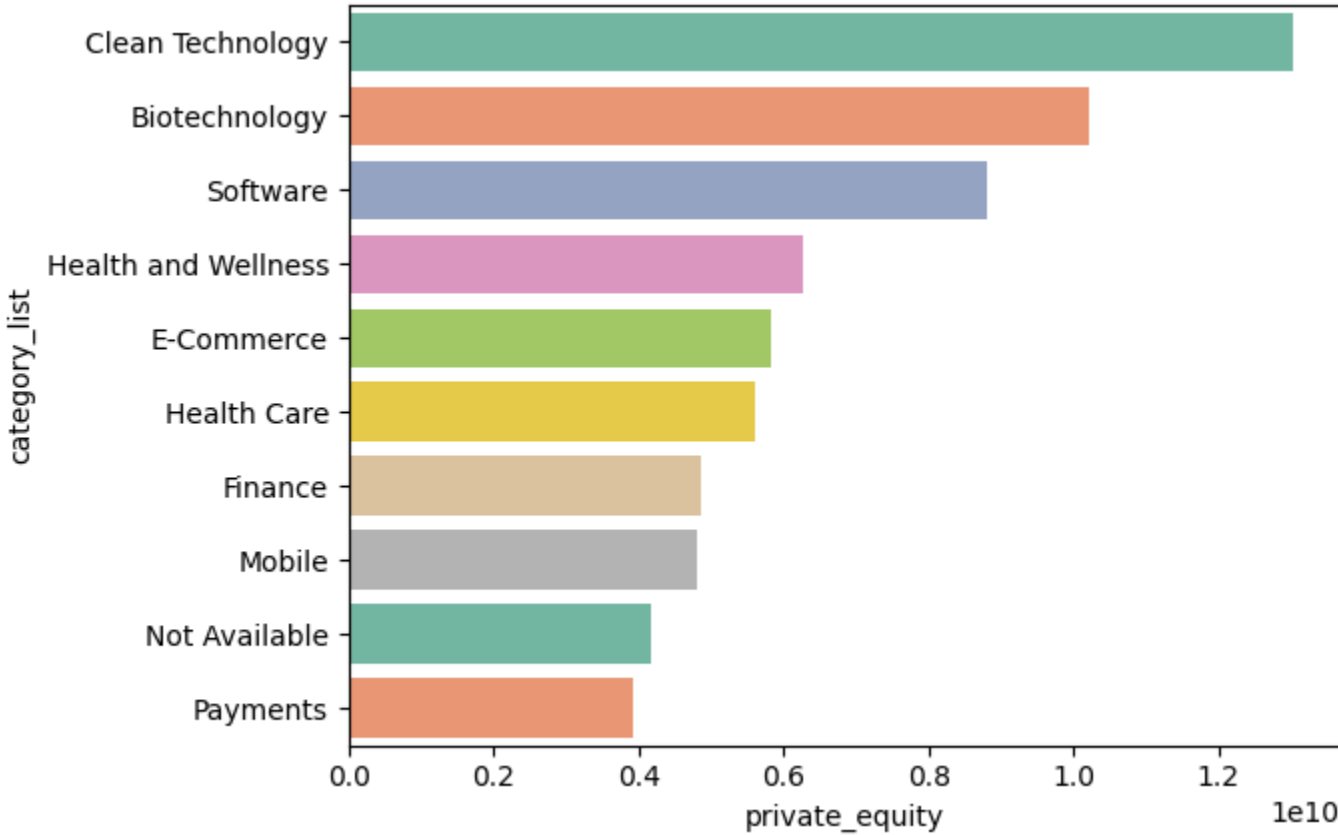

Grant Funding Distribution Across Categories

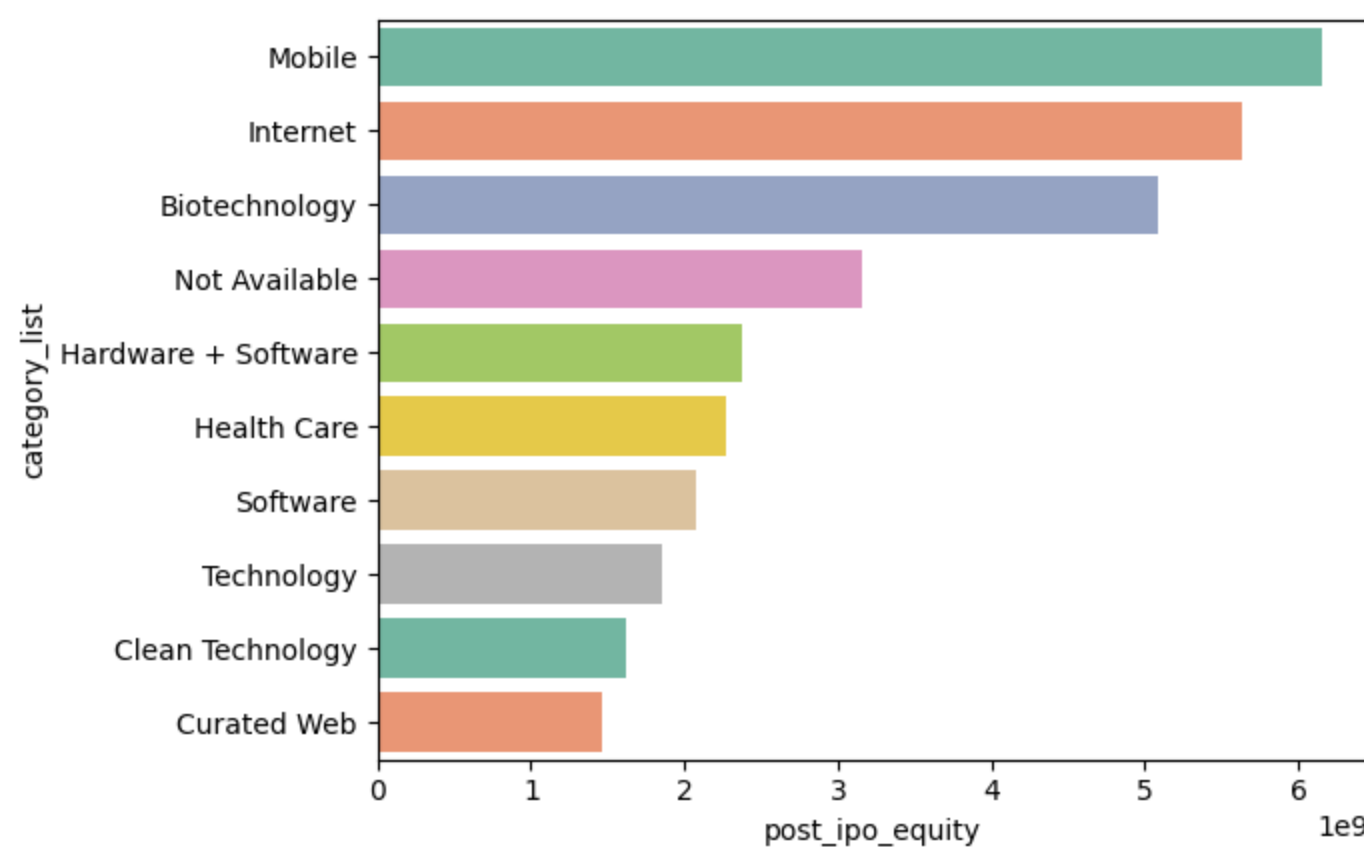

- Grant funding is a financial award given to an individual or organization by a government, foundation, corporation, or other organization for a specific purpose.
- Grants are different from loans because they do not need to be repaid.
- Education category being the top category to attract successful grant fundings.

Private Equity Funding Distribution Across Categories

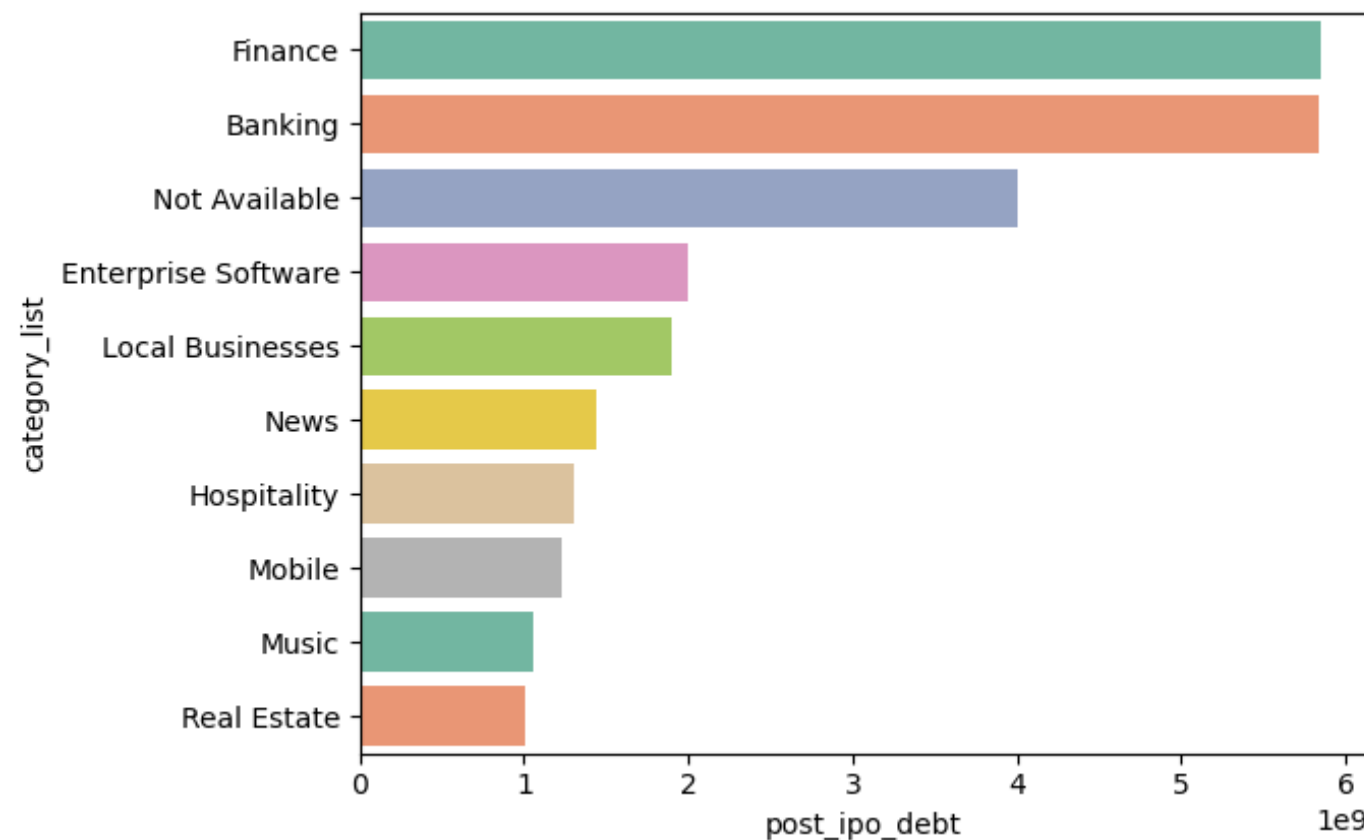

- Private equity (PE) funding is a way to invest in private companies that are not publicly traded.
- PE funds are pools of capital that are managed by a private equity firm, and investors contribute capital to become limited partners in the fund.
- Clean Technology category being the top category to attract large private equity fundings.

Post IPO Equity Funding Distribution Across Categories

- Post-IPO equity funding is when a company invests in another company after it has gone public.
- Shares that are eligible for trading on public stock exchanges after a successful initial public offering.
- Mobiles category being the top category to attract large post IPO equity fundings.

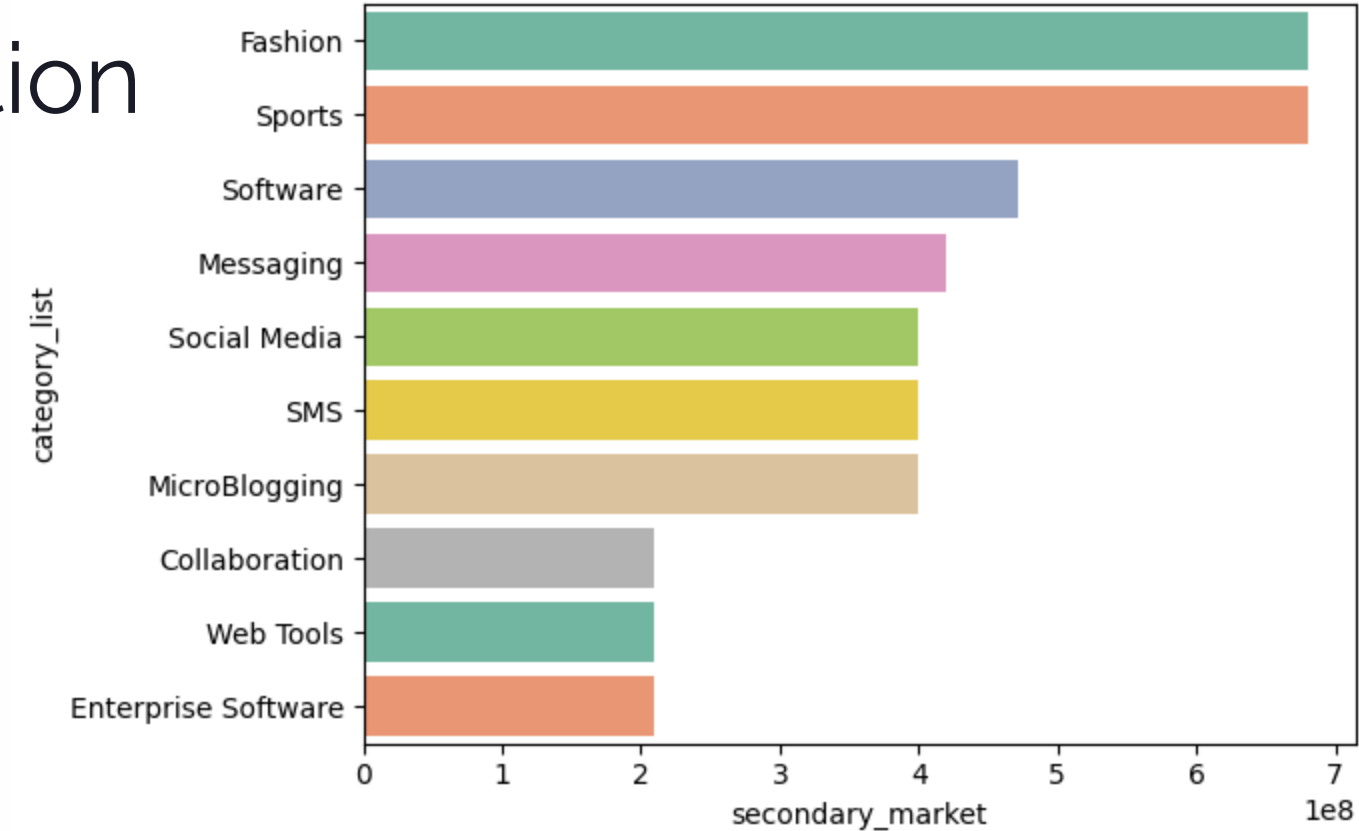

Post IPO Debt Funding Distribution Across Categories

- Post-IPO debt funding is when a company borrows money from lenders after it has already gone public.
- The company promises to repay the principal and interest on the debt, similar to debt financing.
- Finance and Banking category being the top category to attract large post IPO debt fundings

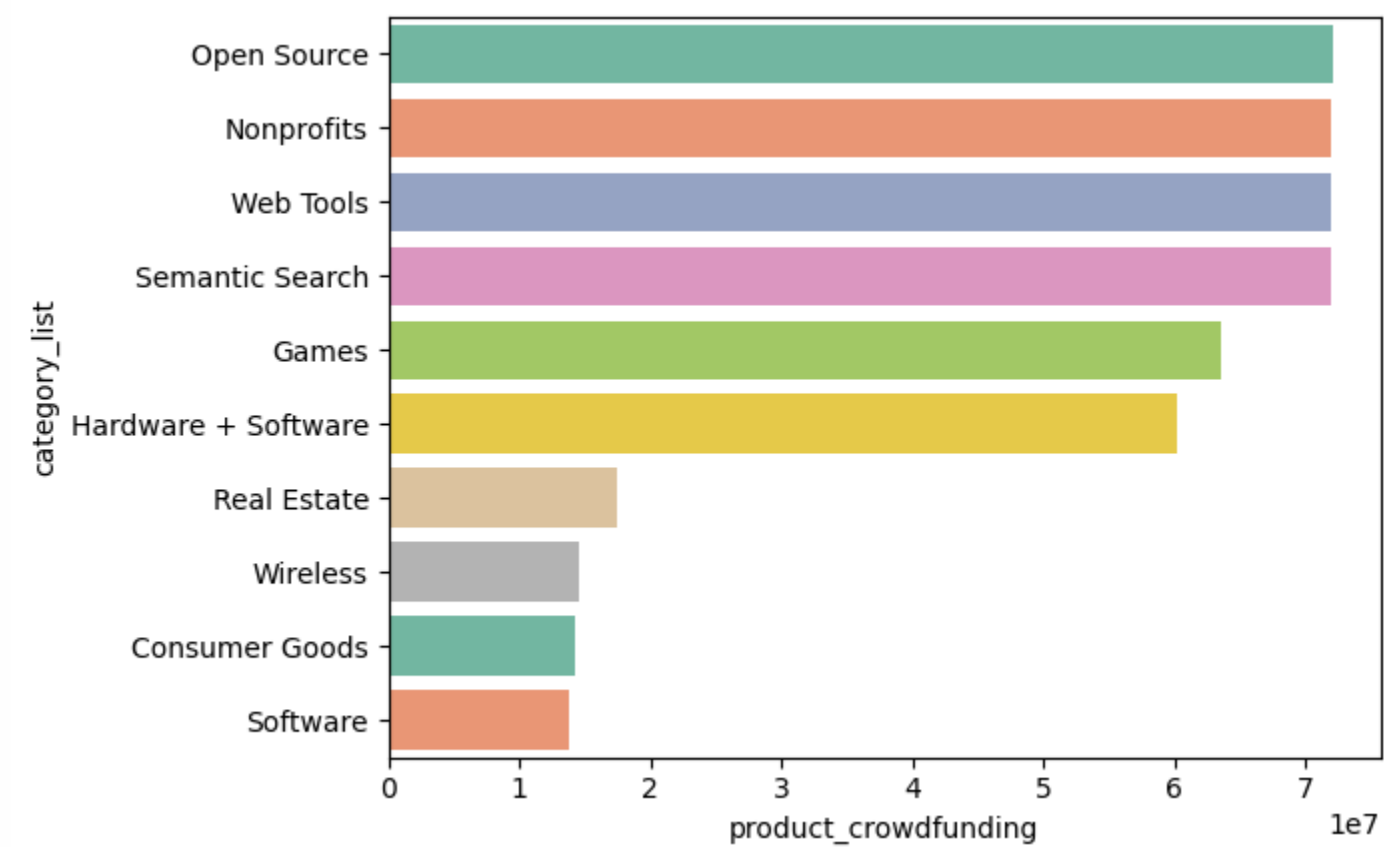

Secondary Market Funding Distribution Across Categories

- Secondary market funding is the buying and selling of previously issued securities in a financial market, also known as the aftermarket.
- The secondary market is different from the primary market, where the issuer sells securities directly to a purchaser.
- Fashion and Sports category being the top categories to attract large secondary market fundings.

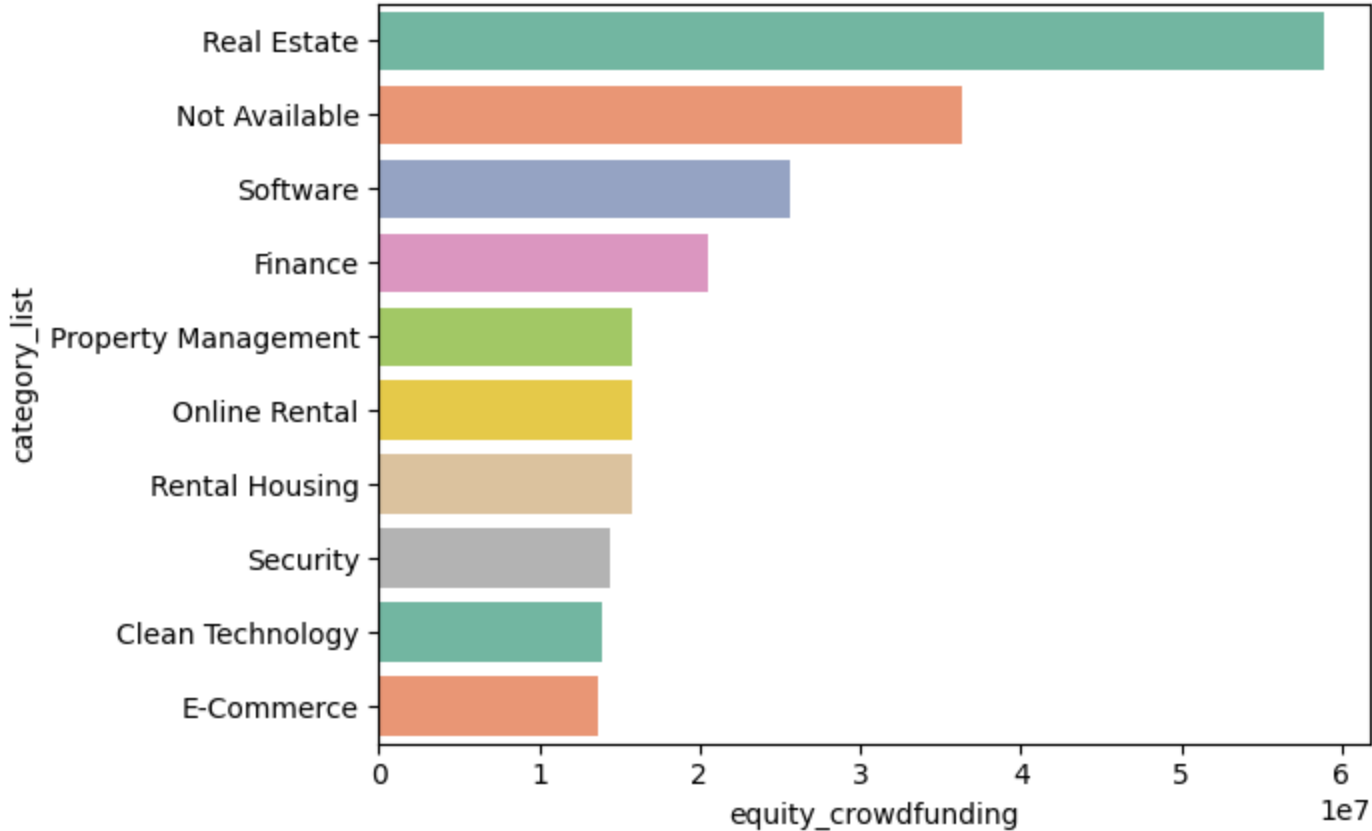

Product Crowdfunding Funding Distribution Across Categories

- Product crowdfunding is a way to raise money from many people to fund the development, manufacturing, and distribution of a product.
- It's a way for entrepreneurs to access alternative funding sources and build a community around their product
- Open source and Nonprofit categories being the top category to attract large crowd fundings.

Equity Crowdfunding Funding Distribution Across Categories

- Equity crowdfunding is a method of raising capital used by startups and early-stage companies.
- Essentially, equity crowdfunding offers the company's securities to a number of potential investors in exchange for financing.
- Each investor is entitled to a stake in the company proportional to their investment.
- Real Estate category being the top category to attract large equity crowd fundings.

Impact of Economic Factors on Funding

1

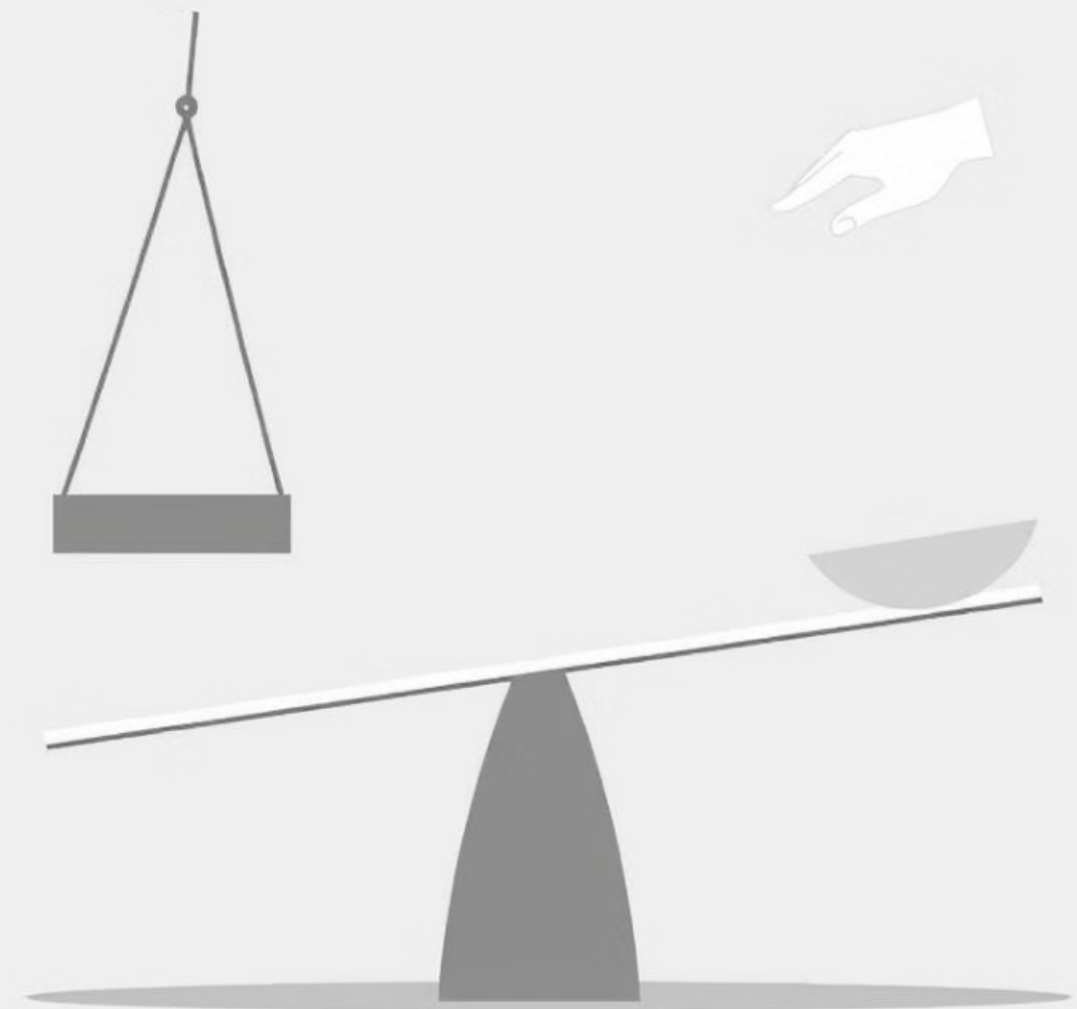

Economic Downturns

Reduce overall funding availability. Startups with resilient business models and essential services may still attract investment.

2

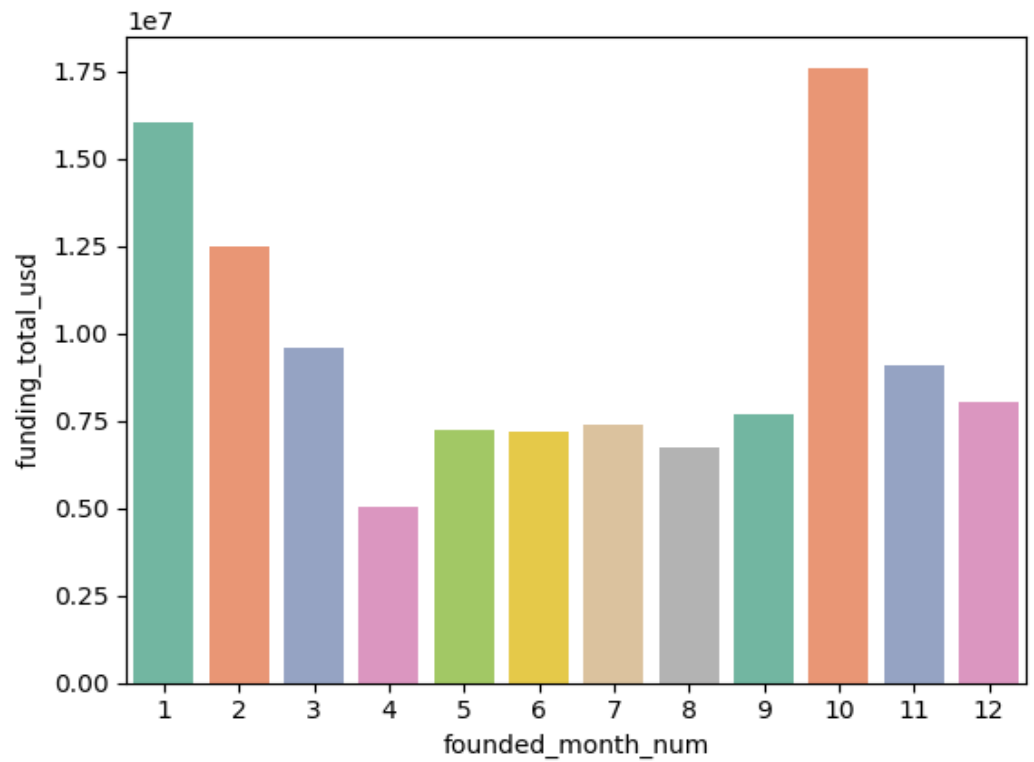

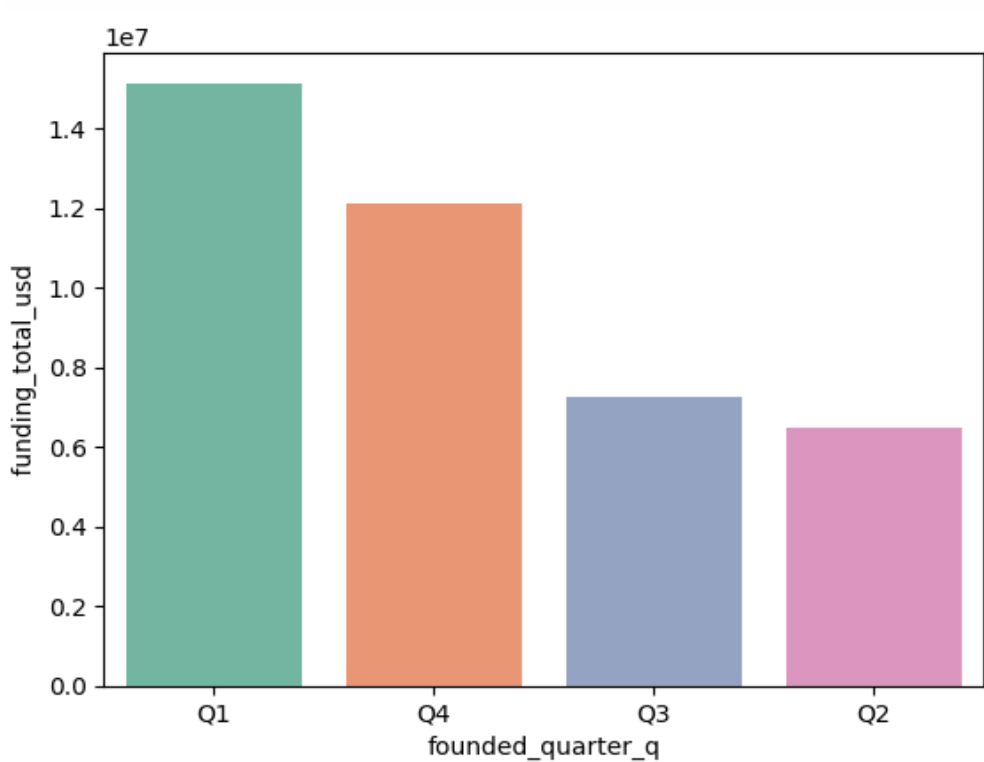

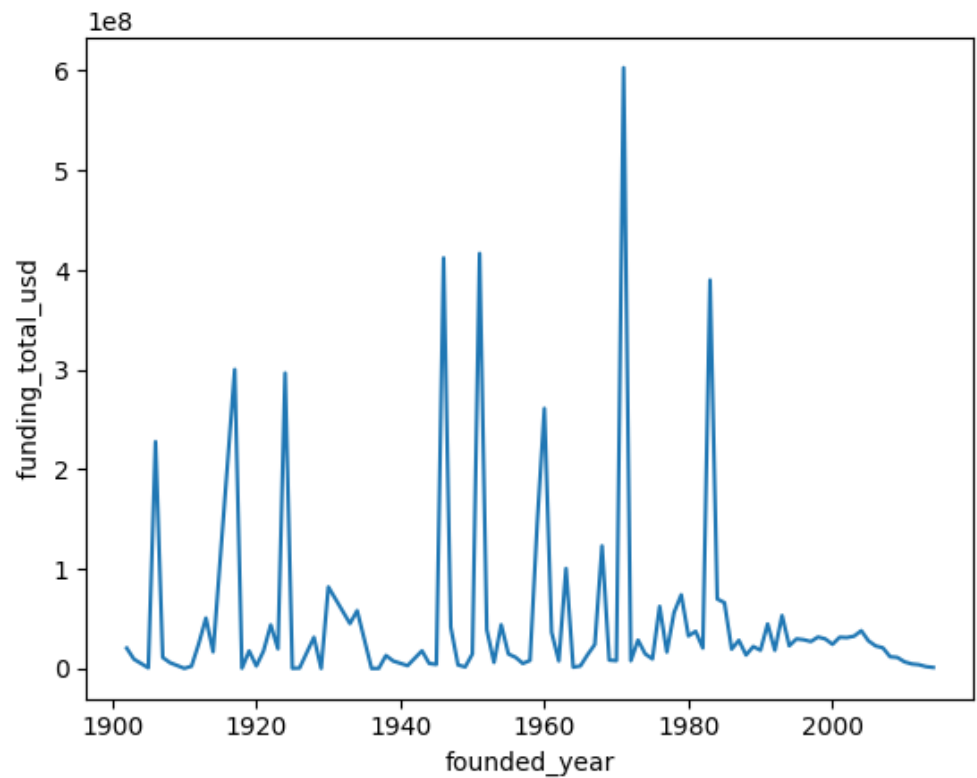

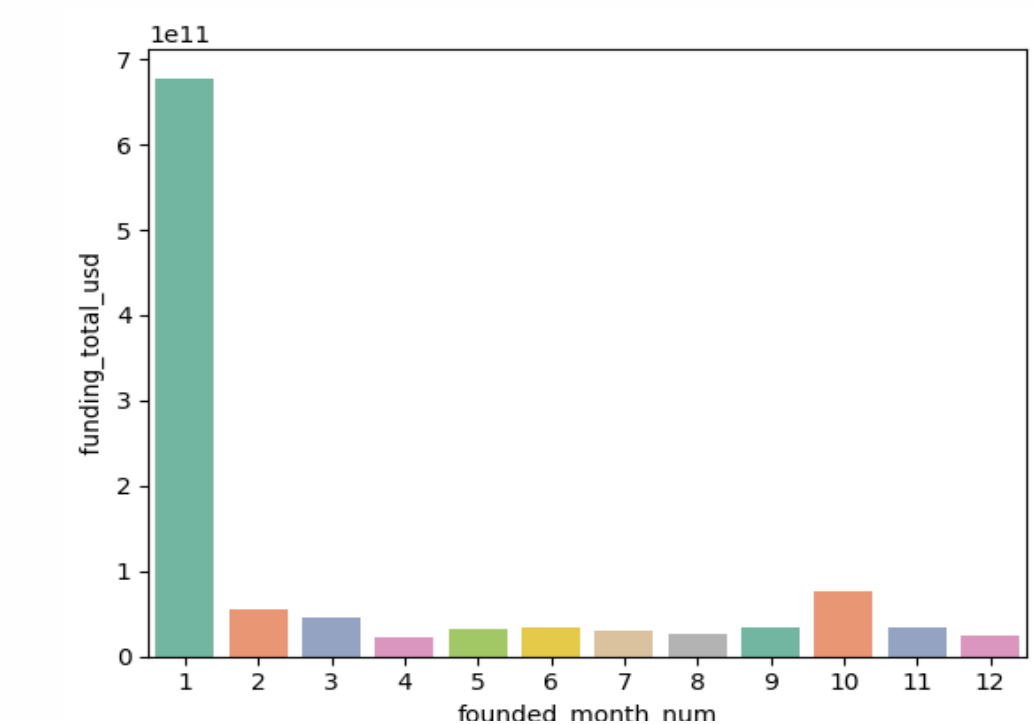

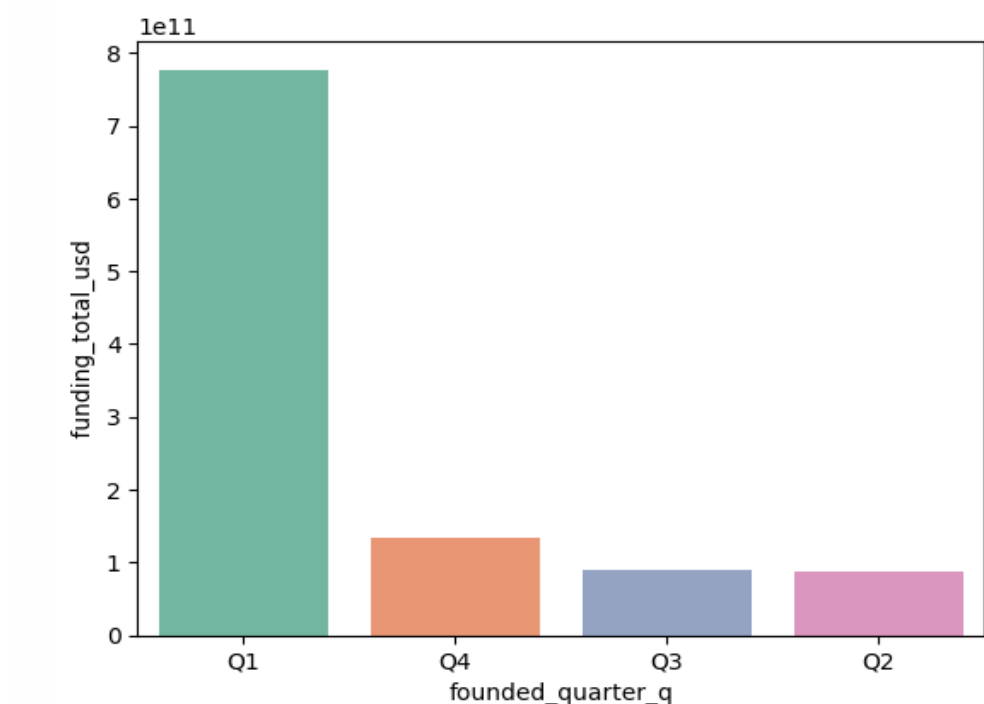

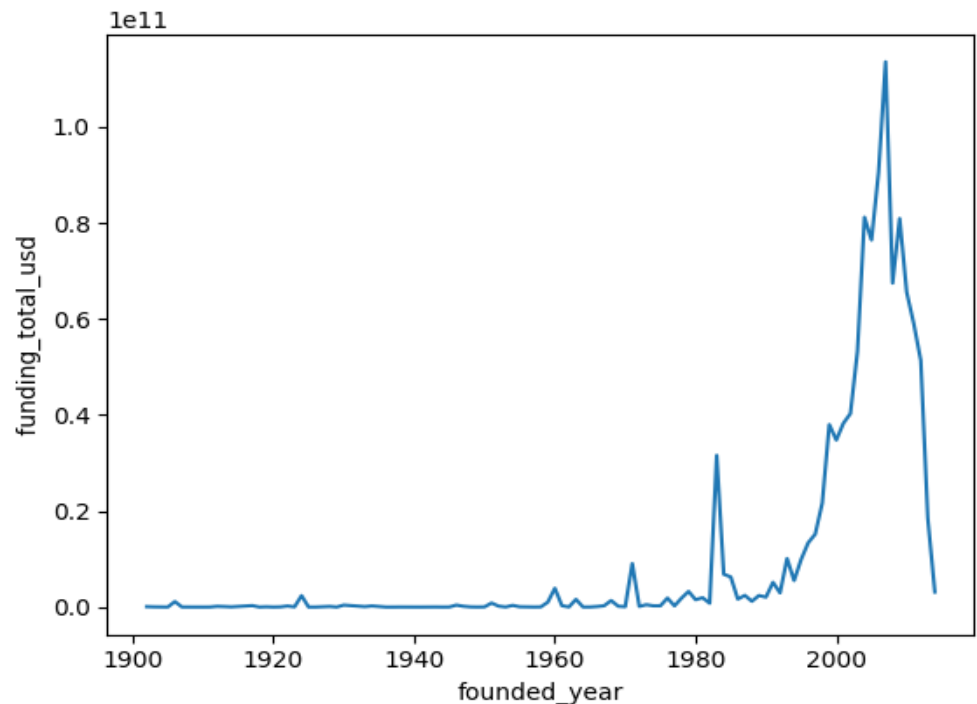

Economic Booms

Increase the availability of funding as investors are more willing to take risks.

STARTUP FUNDING

Startup Funding Trends on Founding Data

Economic Factors Influencing Funding

Market Conditions	Impact on Funding
Bullish markets	Increased funding activities as investors are more willing to take risks.
Bearish markets	Tightened funding availability due to investors' increased risk aversion.
Interest Rates	Lower rates make debt financing more attractive, while higher rates can deter investment.
Government Policies	Tax incentives, grants, and supportive regulations can attract startups and funding.

Navigating Economic Uncertainty

1

Economic Downturns

Maintain financial flexibility by focusing on essential services, operating leanly, and securing a longer runway through conservative financial management.

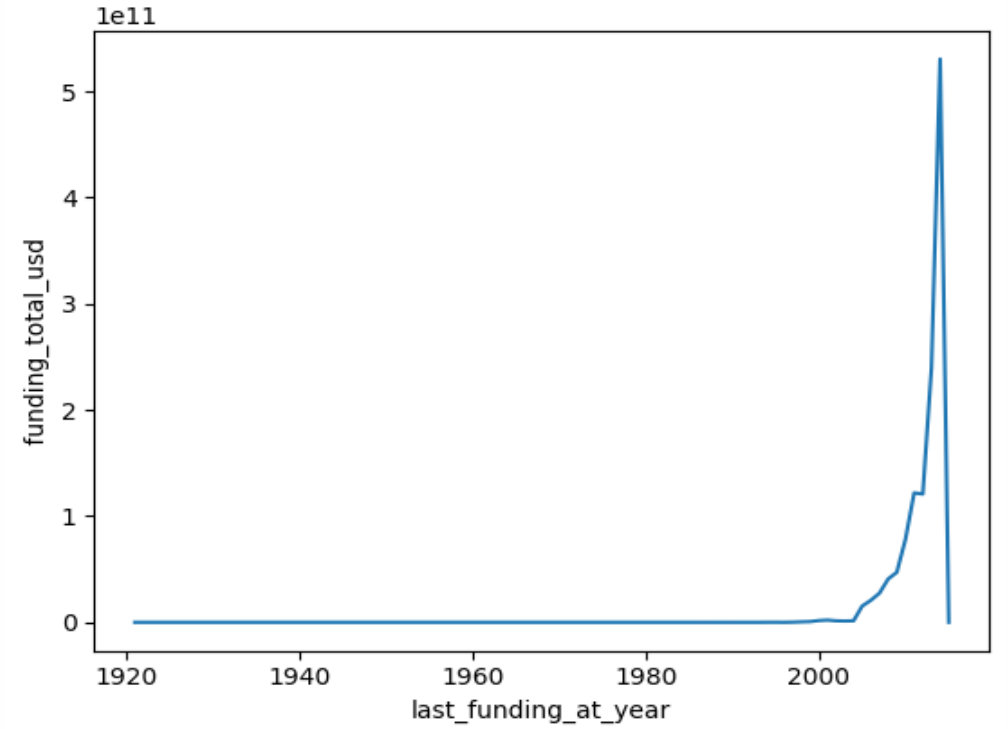

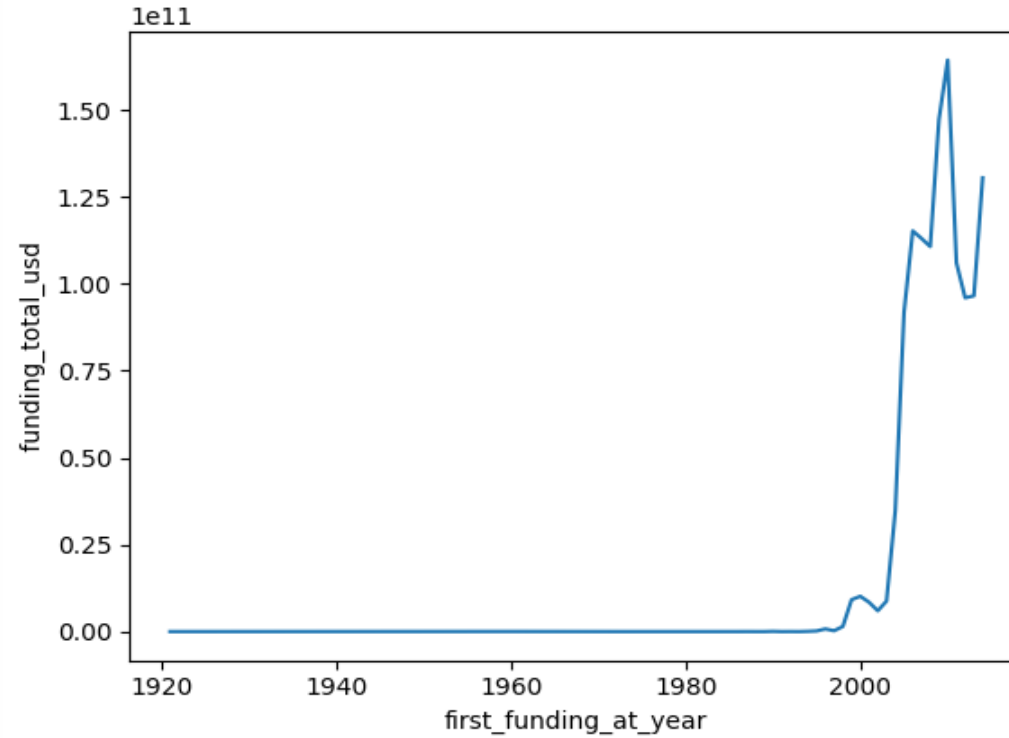

2

Economic Booms

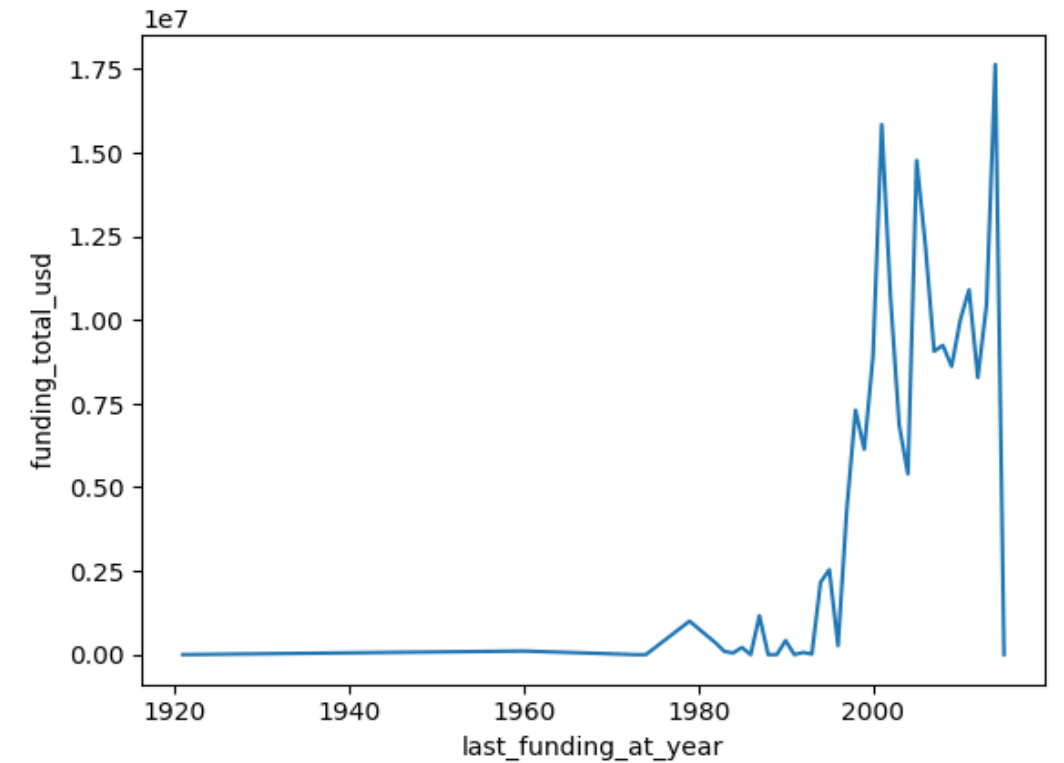

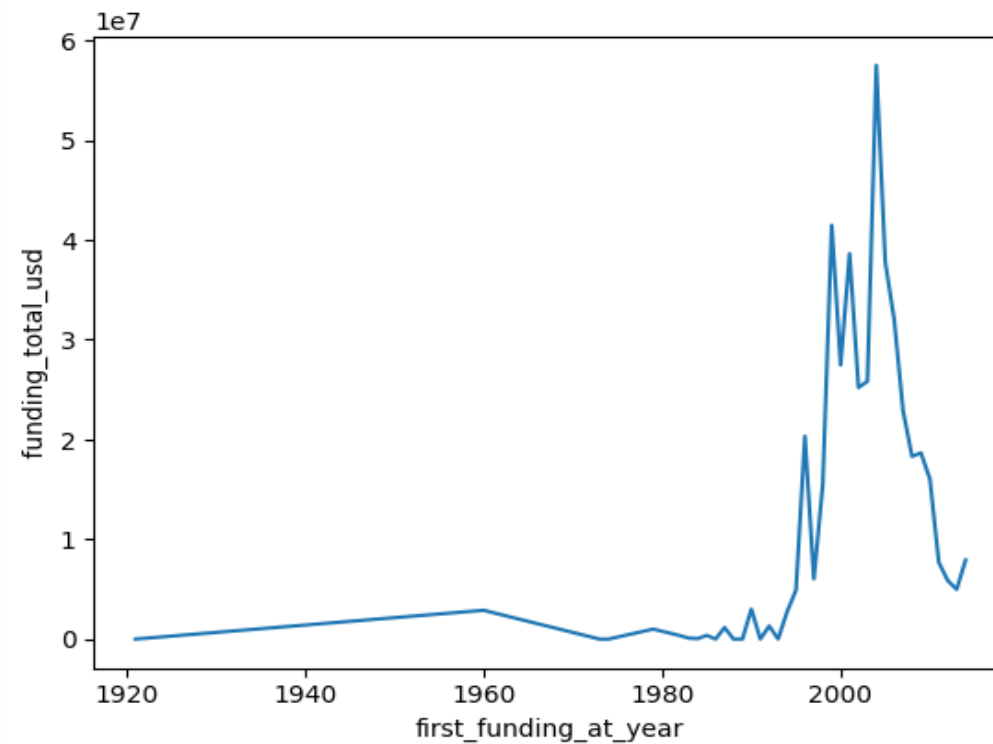

Leverage the availability of capital to scale rapidly and expand market reach.
